Students lead the way...so have your say!

**YOUR MANIFESTO:**

As a third year medical student I am fully aware of the trials and tribulations that we face as we start university as a fresher, as well as the issues that develop throughout the years of our university life. One of my main goals is to ensure that every single one of your voices is heard.

Through my involvement in raising money for charity through various societies as well as supporting students by being a mentor, I can understand and appreciate the importance and great advantages of our union. However I believe there is always room for improvement. This belief has fuelled my commitment to important campaigns that not only allow students to express themselves but have lead to important changes being made.

I have the passion, the skills and the experience that is necessary to guarantee that our extremely successful union is not just sustained, but improved in every way possible!

Students lead the way...so have your say!
