

Full Manifesto:

Dear Students,

My name is Chris, and I am a 3rd Year Medic who is friendly, approachable, and always willing to talk to others about anything which may concern them. I will always be open to suggestions about how to improve the Union and make changes which will benefit students.

In order to achieve this, I promise to organise consultations on issues which matter to students and thus represent their views to the Medical School accurately and efficiently – I will make sure their voice is heard!

I believe that students should also be informed about the results of consultations so that they know what the student position is. In addition I think it is necessary to inform them about any decisions the Medical School has made or intends to make as I feel that there is currently confusion and lack of information about such things e.g. the Year 3 Oncology portfolio. I would therefore aim to improve communication between RUMS, the Medical School and students.

Please vote for Christos Michael for Clinical Vice President for UCH!
