

Re-elect Adam Sawyer Clinical Vice-President (Hampstead)

I have held this post since October and seek re-election to further my original and new aims.

- I have experience of identifying, highlighting and working to solve problems in the medical school
- I will help keep up the pressure on the college to preserve medics' spaces like Huntley Street and common rooms at hospital sites
- Ongoing serious problems with parts of the third year course need to be addressed. I have begun this process and want to finish it.
- Open a discussion on how to solve the problems with the taught course, considering new or improved ways to deliver it
- Re-examine our in-course assessments to make them fairer and more reliable
- Representation of medical student views at all levels of the Union. I have been vocal in defending our interests and views, and want to strengthen and build on this record.
- Better support for RUMS events and an improved calendar for Huntley Street
- Reinforcement of the "Keep Wednesdays Free" policy to teaching staff

I want to see improved opening hours for our libraries and facilities – this process has been begun, I want to see it finished so we have space to study at clinical exam times, without being forced out by other subjects, and without closure with no regard to our needs.

With the resources and campaigning powers of the Union focused on delivering what is important to us, I believe we can improve the student experience here for all medics. With my experience, if re-elected I can continue to do just that.
