

## **VOTE ALEX NESBITT for MPSO**

When elected, I will use my experience in the Union as an executive officer and as Treasurer of both RAG and RUMS Boat Club, to further the interests of the students I represent in the following ways:

### **Welfare, Education & Representation**

I will operate an open-door policy for any student to come to me with any problems or new ideas to improve the experience for RUMS and post-graduate students.

I will work with both executive teams to improve representation for all students ensuring student feedback is passed on to relevant committees, and will ensure student reps receive the training and guidance they need to make a difference for RUMS and post-grad Students.

I will work with student reps and the relevant schools on educational issues such as quality of teaching and assessments, to ensure that teaching is as effective as possible, especially in clinical years, and that assessments are fair and useful to the student.

I will ensure that welfare services are as accessible and relevant as possible, particularly around exam periods when stress levels are running high.

I will aim to ensure postgraduate forums are well-attended and that they help to identify the changing needs of students in the post-graduate school. I will also work closely with the Postgraduate Development Worker to identify postgraduate needs and address them, particularly with regard to funding.

### **Sports & Social Scenes**

I will strive to support RUMS Sports teams and Societies, empowering them to expand in new directions and start new projects.

As a sportsman myself, something I strongly believe in is keeping our Wednesday afternoons free for sports and society activities, and I will fight for this to remain for students as all levels.

I will ensure that the new facilities to replace Huntley St are used to their full potential, with a range of events catering to all at RUMS, encouraging students of all years to engage.

I will also work closely with Ball and Fresher's week committees to ensure that they remain highly successful and only get better!

The developing postgraduate social scene is also something I will work hard to maintain, with nights in the union specifically for postgraduates, and support with accessing clubs and societies.

The bottom line is that I'll be representing you, so will devote my time and energy to improving your experience in the Medical and Post-graduate schools.
